

Steel constructions

CONSTRUCTION

BORINS manufactures steel frames for modular buildings and assembles sandwich walls of various sizes for construction and industrial projects. Full steel roof coverings and sheet metal roofs are manufactured for loading docks and the like. Support platforms with railings can be designed for machines and plants. We manufacture and repair various forms of stairs and ladders in both steel and aluminum.

PRODUCTS

- Modular buildings in steel.
- Roof coverings and protection.
- Support platforms and rails.
- TStairs and ladders in steel and aluminum.
- Other products such as floating docks, machine beds and travers frames.

MODULAR BUILDINGS

Product description

BORINS constructs modular buildings with steel frames of different sizes. The design can be done by us or an outside construction company. The roofs, floors and walls of the frame are made of standard beams which are then provided with modules in sandwich construction.

Applications

The buildings are used by the process industry and the recycling industry. We work with construction companies in the field of casting and other specific areas. The buildings can be fitted with different coatings according to the customer's needs.

Steel constructions

SCREEN ROOFS

Product description

BORINS manufactures screen roofs of various sizes and designs for loading docks and other areas in need of weather protection. The skylights are made of steel frame and have sheet metal roofs.

Applications

The roofs are used by wholesale companies and various public sector businesses. They can be made for one or up to four gates and in smaller format for entrances.

SUPPORT PLATFORMS

Product description

We manufacture support platforms, walkways and work platforms with rails for different types of industrial plants. The implementation is done according to standards in terms of personal safety. The railings are galvanized for good durability and high quality.

Applications

Support platforms and walkways are used to improve accessibility and access for servicing and maintenance of individual machines or entire facilities.

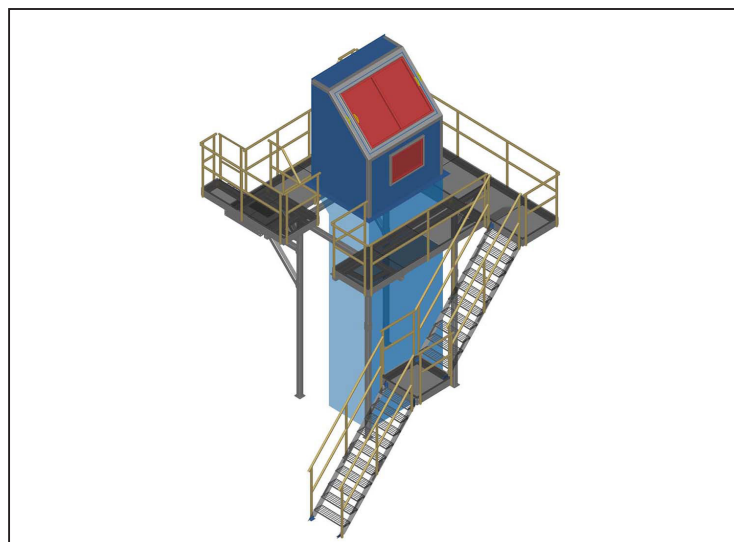

STAIRS AND LADDERS

Product description

We manufacture stairs and ladders for support platforms, work platforms for machines and other buildings. Implementation takes place according to the standards that exist in terms of personal safety.

Applications

The stairs and ladders are used to improve access for servicing and maintenance of individual machines or entire facilities. We also manufacture stairs and ladders for buildings and bath houses etc.
