

Products and services for industry and recycling

Disc sorting machine

Conveyor for ash in heating plant

Channel baler from MACPRESSE

ABOUT THE COMPANY

Borins is a service company active in the engineering and recycling industry.

We perform various services such as construction, maintenance and repairs.

We design, manufacture and install equipment for the recycling industry as well as carry out projecting of entire plants.

We can manufacture smaller series of mechanical details and spare parts.

We carry out service and repairs on machinery and equipment for industrial and recycling plants and heating facilities.

Manufacturing and repairs are done in our workshop which is equipped with machines to perform most mechanical work and welding.

The company has approx. 30 employees who have and a broad experience in the field of engineering.

This in order to be able to manufacture products for and service the industry, small businesses and the public sector.

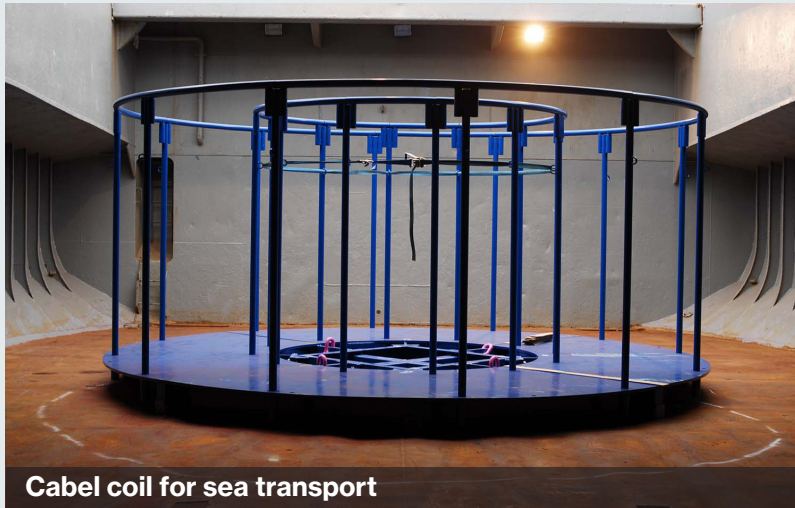

OUR CUSTOMERS

Our customers are active in many different areas from small businesses to major industries. We are mainly engaged in the following industries:

- Recycling industry.
- Manufacturing industry.
- Sawmill industry.
- Paper industry.
- Heating plants.
- Construction business.

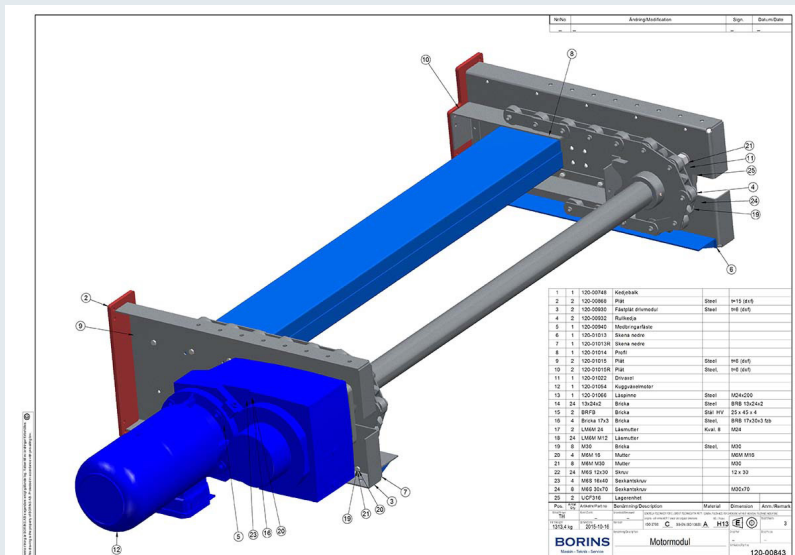

Conveyor for recycled paper

Cabel coil for sea transport

Maintenance and service of heating plant

Construction with CAD tools

PRODUCTS

Borins has a wide range of products manufactured with selected high quality subcomponents.

The product range includes: balers, sortings systems, conveyors, cutters, mills and special transport equipment.

The products are used in the recycling industry, heating plants, paper industry, sawmills.

We also do steel structures for buildings with modular facades and roof coverings and protections.

Other products we manufacture in steel and aluminium are support stairs and rails.

The product range includes:

- Conveyor systems for different material.
- Sorting systems such as: vibrating- and disc screens and trommels.
- Channel balers from MACPRESSE for recycling fractions.
- Modular buildings in steel.
- Special machines such as cutters.
- Special transport equipment such as modified containers and cabel coils.
- Roof coverings and protection.
- Support stairs and rails.
- Travers frames.

SERVICE

For emergency services on our products, we are available at short notice and evenings and weekends.

We have a large spare parts store for our own products and stock and manufacture new spare parts.

Borins allows you to write favorable longer or shorter service agreements for maintenance work.

Today we have a number of service agreements with different customers.

SERVICES

Borins has a wide range of services for industry, small companies, municipalities and public companies.

We do everything from new constructions using CAD tools, maintenance and service, demolitions and discards.

A number of installations with conveyors have been designed for the recycling industry.

Today we maintain and service a number of major industrial companies and heating plants.

The following services are performed by Borins:

- Construction and design.
- Maintenance and service.
- Service agreements.
- Montage.
- Relocations.
- Demolitions.
- Projecting.
- Repairs.
- Laser alignment.

WORKSHOP

Our workshop is used for manufacture of our own products and for repairs and maintenance work for our customers.

The workshop is fully equipped with machines and tools for a variety of engineering works, both large and small.

In our vicinity there is also a blasting and painting workshop.

Below is a list of some of the workshop services we perform:

- Bending and rolling of pipes and sheets.
- Milling, carving and turning.
- Welding of aluminium, stainless steel and cast iron.
- Plasma cutting.

Roof covering of loading platform

Manufacturing of disc screen machine

MIG/MAG welding in workshop

Borins service van

QUALITY ASSURANCE

Borins meets the requirements of the EU standard EN 1090-1:2009 (A1:2011) as regards welded steel and aluminum products up to EXC 2.

We also meet the requirements of the standard SS / EN ISO 3834-2: 2005 regarding quality requirements for melt welding of metallic materials (Part 2: Comprehensive requirements). Manufacturing can then be made of supporting steel structures, working platforms, machine racks and smaller storage buildings.

The certifications have been carried out by the company A3CERT in 2021 and are valid until 2026.

Borin's personnel have training and certificates in areas such as: IWS, IPW, SSG, trucks and travers.
